Summary

I am a Business Administration graduate who is building a career in Data Analytics.

I have learned SQL, Power BI, Excel, and Google Sheets through online courses and hands-on practice. I enjoy working with data, cleaning datasets, creating reports, and turning numbers into clear insights.

My background in retail, manufacturing, and hospitality helped me develop strong attention to detail, responsibility, and process discipline.

I am currently looking for a remote internship, volunteer role, or junior opportunity where I can gain real-world experience, improve my technical skills, and contribute to a data-driven team.

I am motivated to keep learning and grow into a professional Data Analyst.

Experience

FILE Market

Retail Sales Associate

March 2025 - November 2025 (9 months)
